Try Pitch

Imagine you are a farmer in **Malaysia**

Is there a safety net for you?

- Local monopoly & lack of trust
- Affordability issues & cash constraint
- Lack of access to adequate products due to aggregate & tailored risk data not available
- Concentrated capacity limit by the insurer
- No suitable distribution structure

Yes, there could be.

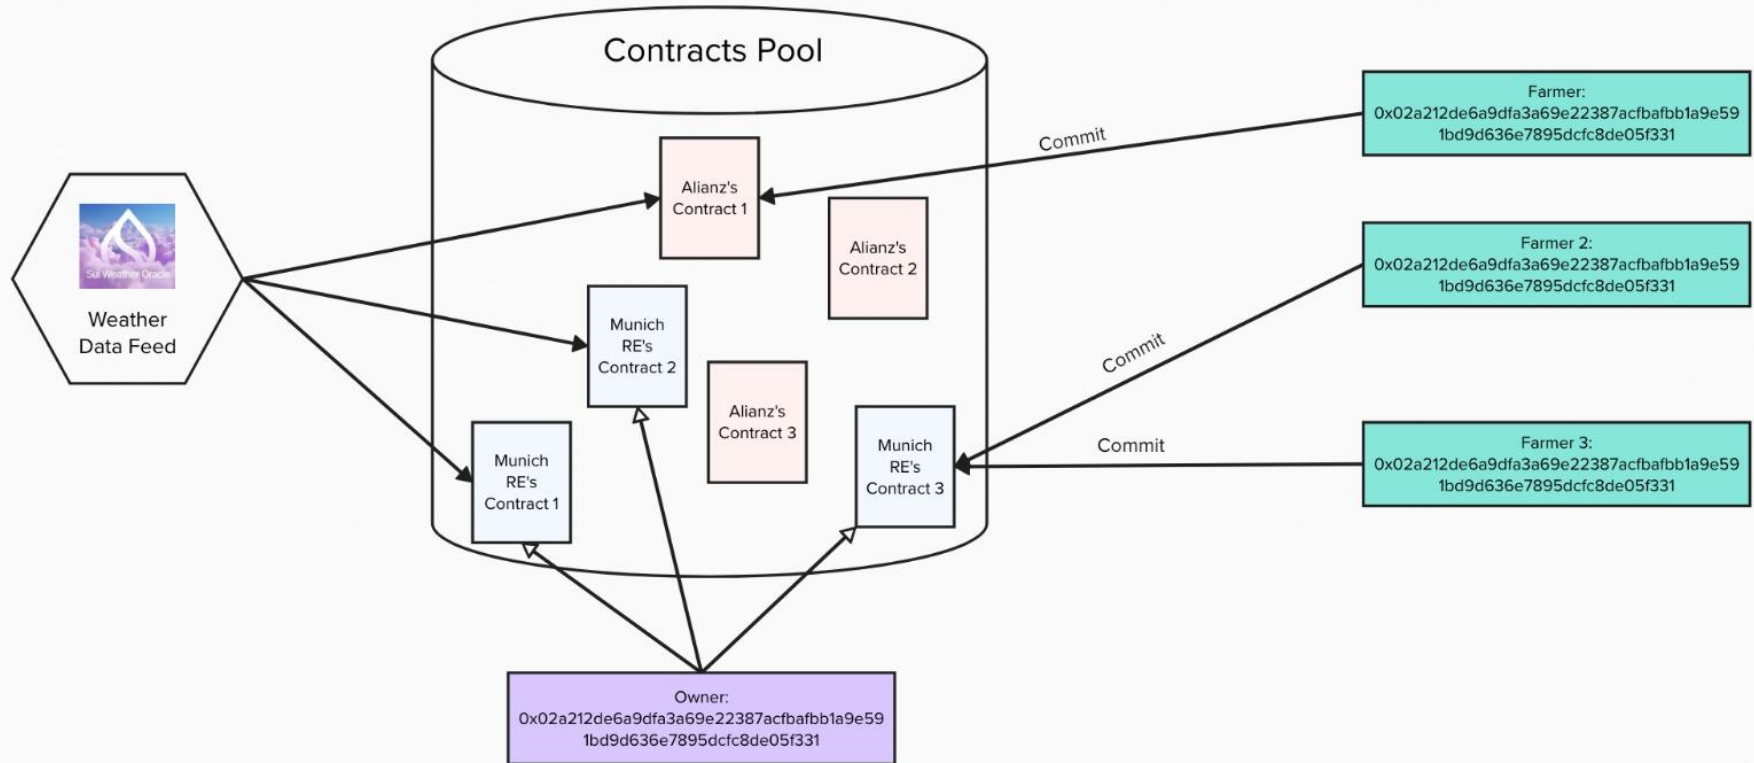

AgriSafe, a blockchain-based weather insurance platform for farmers, insurers, and other fair trade participants.

User interface

AGRISAFE

Benefits

- **Various offers from insurers around world, more competition leads to fairer contracts & prices**
- **Fully digital & transparent contract & reimbursement history**
- **Optional financing from fair trade participants**
- **Chances for insurer to diversify**
- **Data feeds to combat insurance fraud**

Stormy wave?

Cover your loss with AgriSafe !
